BOLD BRASS

+ MULTI-PURPOSE APPEAL

Brass can be used for tapware, sinks, handles, knobs, lighting and even rangehoods in kitchens, making it a multi-functional material suitable for a variety of tasks. "The greatest pro with brass is that it creates an immediate, beautiful focal point in any room," explains Daniela Santilli, bathrooms and kitchens merchandising leader at Reece. "But the best way to use brass is to pair it with a simple colour palette. A black kitchen with brass channels old-world glamour." The metallic splashback in this kitchen, by Sydney's Janz Designs, gives the space a dose of pizzazz.
